

Video calls with ADHDcentraal

- 2 days before your appointment, ADHDcentraal will send you a link for video conferencing with your practitioner. Click on the link and check whether your camera and microphone are working properly. After that you can close the window.
- When your appointment starts: you will receive an e-mail from your practitioner to start the video call.
- Click on the "Meeting link" (e.g. "meet.google.com/xns-yocm-cfh") in the email from your practitioner.

- You may be asked to activate your camera and microphone.

- Enter your name in the window that appears and click on the green **Participation Request** button.

- You may have to wait a moment while the practitioner grants you access. You will then automatically be taken to the video room.

Technical problems

Is video calling not possible for technical reasons? Please inform your therapist about this. He or she will call in the help of the ICT department of ADHDcentraal.
